

## Driving Safely

*Does the work (your driving) involve objects, motion or force that could cause harm?*

This is one of the six SafeThink™ questions that can keep you safe while you are driving or doing tasks at home and work.

If you answer “yes” to this question, then ask the following questions to **identify** and **predict** hazardous situations:

- *What type of harm does the object, motion, or force pose?*
- *What conditions, actions, and events could cause the object, motion, or force to harm me?*
- *What can I do to prevent being harmed by the object, motion, or force?*

Ask these questions to increase your ability to avoid the consequences of hazardous driving situations!

Having answers to these questions will go a long way towards keeping you and those you love safe.

**Try SafeThink™ . . . it works.**
